

ONCOLOGY SERVICES

Oncology facials and skincare is a modified client service designed to meet the unique and changing needs of someone in or with a history of cancer treatment.

Jodie, your Oncology trained Facial and Skincare therapist, will provide treatments that are focused on restoring, nurturing and replenishing the skins barrier. This is achieved while working in clinical consideration of safe practices and providing an individual experience to meet your skin needs.

TATTOOING

Ombre Brows

The Ombre brow technique is the ultimate bold look for clients wanting sharp and defined brows. The Ombre shading technique is performed with a cosmetic tattoo machine to create a beautifully soft transition in dark to light blending starting from the tail of the brow. The result of this procedure aims to imitate a beautifully powdered makeup look with a perfectly defined shape.

Microblading Brows

For perfect symmetry and lasting effect, Microblading is a semi-permanent Eyebrow Tattoo. This technique uses the finest of hair strokes to re-create, colour, fill, and re-define the eyebrow without the heaviness of a bold tattoo. The Microblading pigment can last a few years on the skin depending on skin type & over time will softly fade away. To keep the definition & fullness of the colour all year round we highly recommend a touch up appointment every 12months.

Combination Brows

Combination brows are perfect for clients wanting to achieve a more powdered look to their natural brows. This procedure combines both “Microblading” and Ombre shading techniques using a cosmetic tattoo machine. This look aims to achieve natural hair strokes along with the depth of shading in the tail of the brows.
